

AUTOMATIC LAUNDRY SERVICE

Vent Jet®

Superior Vent Cleaning Solution

The Superior Vent Cleaning Solution

Automatic Laundry continues to be at the forefront in the designing and cleaning of dryer venting systems by incorporating the latest technologies available. Our Vent Jet® system represents a significant improvement in dryer vent cleaning and we are proud to offer this service to our customers.

Traditionally, dryer vent systems have been cleaned by using brushes to aggressively scrape lint out of the vents. Although this procedure works, it has several limitations that our Vent Jet® eradicates. Brush-based systems cannot maneuver well through ninety-degree turns or travel long distances and are more prone to damaging vents.

The Vent Jet® sends high pressured air through specially designed air nozzles to break up lint in a non-invasive manner without damaging vent systems. This system removes more lint and reaches more areas than brush-based systems. The Vent Jet® can clean vents up to 500 feet in length.

The entire process can be performed from the outside of the building and the dryers can be used throughout the process. All the lint that is removed from the dryer vents is vacuumed up so there is no mess left behind.

Benefits from Clean Dryer Vents:

- OPTIMUM EFFICIENCY
- ENERGY SAVING
- DECREASED DRY TIME
- REDUCED SERVICE ISSUES
- SAFER AND CLEANER LAUNDRY ENVIRONMENT

Why the Vent Jet®?

- MAXIMUM CLEANING
- ZERO DOWNTIME
- PROFESSIONALLY DONE
- PORTABLE AND SELF-POWERED
- NO MESS
- UP TO 500 FEET
